The Vanilla Ice Project

Van Kirk & Sons is extremely proud to have teamed up with pop icon, TV personality and home renovator extraordinaire, Vanilla Ice, for seasons 2, 3, 5, 7 and 8 of his breakthrough reality show, The Vanilla Ice Project on the DIY Network.

Van Kirk & Sons worked closely with Rob and his crew to design and build several, one of a kind backyard oasis that only Van Kirk & Sons could bring to life! – Check out this amazing slice of paradise, only on the DIY Network!

Van Kirk & Sons and The Darrell Gwynn Foundation

The Darrell Gwynn Foundation's mission is simple – to provide support for people with paralysis and prevent spinal cord injuries. It was a match made in heaven with Van Kirk & Sons' mission to build each pool as if it were going in their own backyard and treat each customer like family. Bobby and Tim Van Kirk, President and Vice President of Van Kirk & Sons, had the pleasure of meeting Owen Johnson at the foundation's "VIP White Party" and special guest Rob Van Winkle, AKA Vanilla Ice. Owen had sustained a spinal cord injury after his family's van was hit by an intoxicated driver when he was six years old.

After learning Owen's story, Bobby and Tim knew right away that they would build a special pool for the Johnsons and another family free of charge. With the help of Vanilla Ice, they could spread the word of this foundation's great work through the DIY Network and over 7 million connections

worldwide. Darrell Gwynn, the founder of the Darrell Gwynn Foundation, introduced Bobby to Derek Avilez, a Davie firefighter and paramedic. Derek sustained a spinal cord injury while skin boarding at the beach with his family in 2010. Owen and Derek, despite their circumstances, have both stayed positive and very involved in the Darrell Gwynn community.

It is well known that water has healing effects, for instance, exercise is especially helpful in cases where a land-based exercise program is not possible due to the intensity of pain, decreased bone density, disability or other factors. The physical properties of water minimize the weight placed on the spine allowing more flexibility during exercises. As of April 10th, 2015, both of the pools are making a huge difference in the lives of these two amazing families.
